

Customer Success

Envy Restoration & Construction

Mesa, AZ

Envy Restoration & Construction specializes in interior and exterior restoration and remodeling for residential, commercial, and industrial new construction throughout Arizona. Their services include property restoration from fire, smoke, flood, water, and odor damage. In addition, they also provide asbestos abatement services.

SITUATION

Envy sends hundreds of preliminary notices and files dozens of liens every year. More often than not, they're filed at the very last minute and on the cusp of the already strict lien timeline due to the nature of their work - where their customers are waiting for long periods of time to receive checks from their insurance companies to pay for Envy's services.

Their team was running into the issue where they were having to file liens close to the last day that they could.

They were in need of specialized and flexible lien services that could cater to these frequent last minute situations.

SOLUTION

After attending a lien law seminar 3 years ago, hosted by Titan Lien Services, Envy started using Titan for their lien processing and haven't looked back.

Now, Envy is working with a single point of contact at Titan that can address their questions and/or concerns almost immediately.

They're able to contact Titan and have their liens processed quickly and meet at their office whenever necessary in order to do so.

“For construction companies it's imperative to send preliens and file liens if you want to get paid. When you file with Titan Lien Services, you KNOW the lien is done correctly. They are there when you need them the most - even when up against the strict time frames. Titan takes the burden off our company completely.”

With Titan, Envy Restoration & Construction was able to:

Discover an efficient and timely solution for all their lien processing needs, including ones that required very last minute preparation.
